

Denys Rosokha

Junior Project Manager

+4916095470041
rosokha.denys@gmail.com
60326 Frankfurt am Main

Project Manager with experience coordinating teams, stakeholders and operational delivery across construction, renewable energy and entrepreneurship. Skilled in project planning, resource coordination, change management and reporting. Completed IT Project Management training with practical Jira experience and designed an AI-supported business workflow using ChatGPT, Google Sheets and Gmail. Now transitioning into IT and digital product teams.

Work experience

Founder | Operations & Project Management February 2026

Ryntovt UG, Frankfurt am Main

- Coordinate B2C and B2B projects across Germany, including suppliers, subcontractors, scheduling, documentation and customer delivery.
- Built and managed a network of 3 independent installation crews across 3 German regions and coordinated 200+ private installation orders.
- Designed a semi-automated lead-to-proposal workflow using ChatGPT, Google Sheets and Gmail, reducing repetitive proposal preparation and enabling faster sales follow-up.

Project Manager August 2025 February 2026

Smartbau Technologie GmbH, Frankfurt am Main

- Coordinated project delivery with 2 junior Project Managers, 4 crews (~20 site workers) and a technical foreman in complex construction and data-center environments.
- Coordinated delivery on a construction project with an overall budget of approximately €1.5M, supporting execution from planning and site preparation through progress tracking and handover.
- Managed client communication, deliveries, work permits, project changes, progress reporting and coordination with planners, suppliers and external workstreams.
- Organized daily operational planning, resource coordination and site reporting while supporting estimates, man-hour tracking and documentation for additional project costs.

Founding Operations Partner | Project Coordination March 2024 July 2025

Renewable Energy Business, Germany

- Supported the launch and operational growth of a renewable-energy installation business focused on solar systems and heat pumps for private and commercial customers.
- Managed B2B communication, project intake, installation scheduling, crew capacity and customer handovers, helping scale operations from 1 test crew to 5 crews / approximately 10 installers.
- Secured cooperation with 3 German solar companies following a successful test period and supported commercial solar projects, including installations above 1 MW.
